

DESIGNER

Seraphic™ Design

Patterned coloured glass

Seraphic™ Design is our range of screen printed patterned ceramic paint finishes, designed for privacy and solar control.

Ideal for diffused lighting and privacy applications such as internal partitions or sunshades, Seraphic™ Design can be incorporated in laminating for enhanced solar and glare control, privacy and as design motifs.

Our standard pattern and colour options are readily available, with custom designs and colour matching available on request.

Features and Benefits

- 12 standard design options.
- Custom designs are available on request.
- Colour matching available on request.
- Can be incorporated with a solar control glass to minimise glare.
- Ideal for design motifs.

Considerations

Design Considerations

- Custom designs require new screens for printing which will impact lead times, screen charges apply.
- When specifying colours please refer to the Seraphic™ colour chart.
- Non-standard colour requests should be supplied in either the Dulux® Master Palette or Dulux® Powder Coatings colour ranges only and subject to sample acceptance.
- Translucent colours will vary depending on the light source and surrounding colours.
- VFloat™ SuperClear low iron glass is recommended for lighter colours and design clarity.

Standards and Installation

- The coated surface must be glazed to the inside of the building or inside a lamination against the interlayer.

Sectors

- Residential
- Commercial

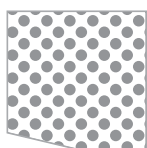

Applications

- Doors
- Partitions
- Overhead Glazing
- Roof Lights
- Partitions
- Sunshades
- Automotive and Marine
